

Product Description

- Invader eliminates variables that cause poor tank mix compatibility and product performance
- Invader is a new generation adjuvant that delays the formation of insoluble precipitates that consume nutrients or render them insoluble and unavailable for plant uptake
- Invader has a high cation exchange capacity with a strong affinity to bond to soil and cations
- Invader is an excellent choice for those utilizing effluent or non potable water supplies

Guaranteed Minimum Analysis

Soluble Potash (K₂O).....5.00%
 Chlorine, not more than.....0.01%
 Derived from: Potassium salt of carboxyl polyaspartate
