

Organic Acid Penetrant

Product Description

- **Command™** is a proprietary formulation that reduces soil surface tension, allowing water and nutrients to reach the root zone.
- **Command™** contains an organic acid that helps deal with bicarbonate issues that can create poor water infiltration.
- **Command™** allows water to move through heavy organic layers preventing creation of oxygen deprived soils.
- **Command™** promotes conservation of water usage.
- **Command™** is designed for application on professionally managed turf for the improvement of nutrient and moisture management.
- **Command™** has an effective level of application that is ideal for injection and is cost effective.

Golf course fairways:	Apply 16 to 20 ounces of Command™ per acre in a minimum of 15 gallons of water. Rates may need to be adjusted up or down until desired performance is achieved. Irrigation soon after application may be advised to move product into the root zone.
Sports and athletic fields	Apply 16 to 20 ounces of Command™ per acre in a minimum 15 gallons of water. Rates may need to be adjusted up or down until desired performance is achieved. Irrigation soon after application may be advised to move product into the root zone.
Injection Systems	Inject 20 ounces per acre in sufficient water to treat one acre of land. Reapplication may be needed every 6 to 8 weeks to achieve desired performance.

Primary Functioning Agent	
Proprietary mixed sulfonates	55%
Carboxylic Acids	15%
Ingredients listed as inert	30%
